# 1) 'Direct license transfer' & 'File-based license transfer' modes

---

2 different operation modes on WebDepot

---

# Direct/File-based license transfer modes on WebDepot

- WebDepot has two operation modes: "Direct license transfer" and "File-based license transfer".
- In "**Direct license transfer**" mode, a PC with an Internet connection directly downloads the license.

On a PC with an Internet connection, you can use WebDepot's "Direct license transfer" mode to directly activate your license and download it to your PC.

On a PC without an Internet connection, you cannot access WebDepot, so you cannot operate WebDepot's "Direct license transfer" mode to directly download the license.

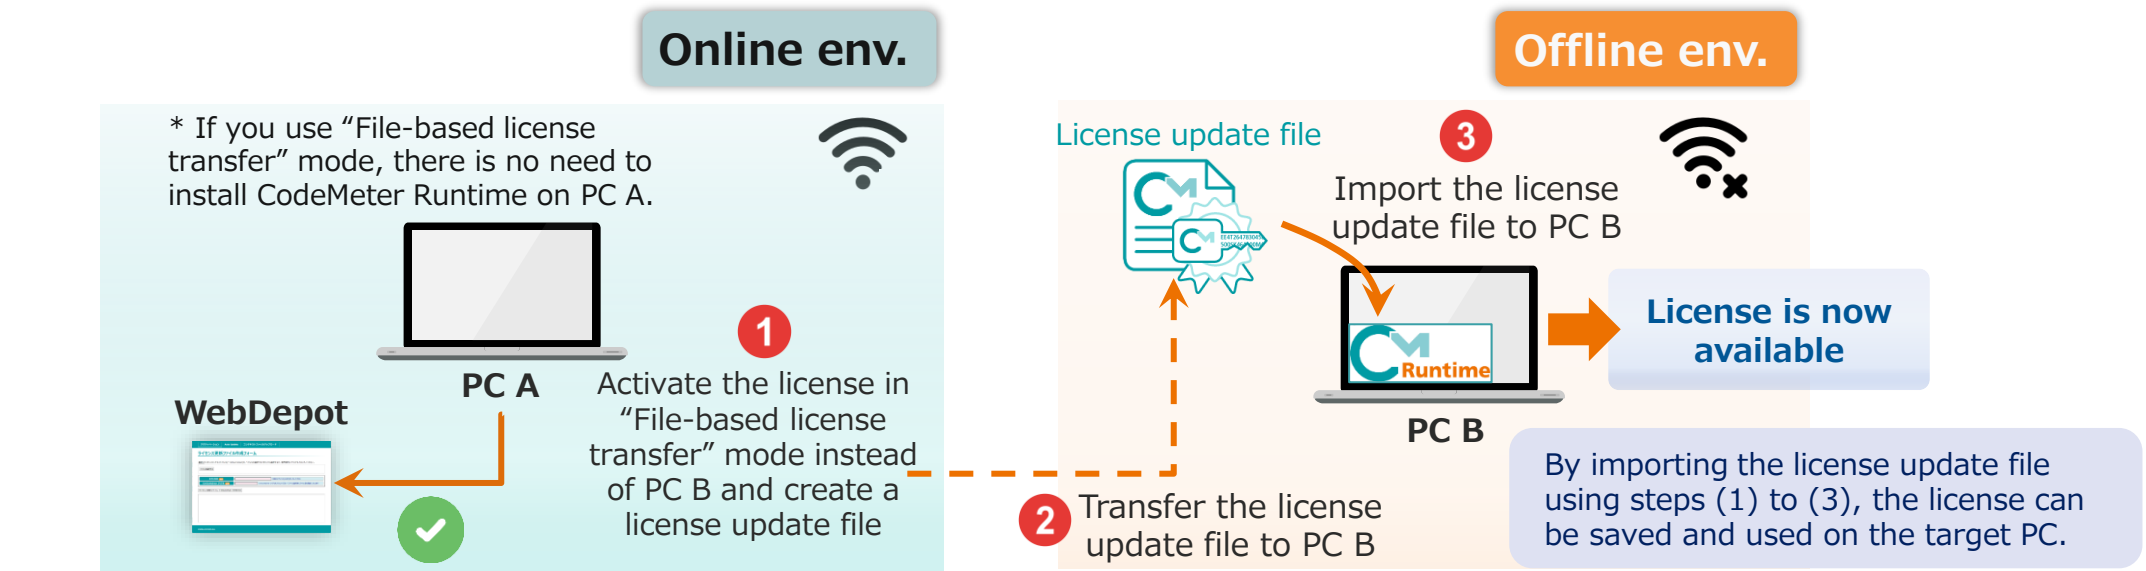

# File-based license transfer mode on WebDepot

- For PCs in offline environments without an Internet connection, you can use the “File-based license transfer” mode.
- Using the “**File-based license transfer**” mode, the license will be available on the offline PC by following steps (1) to (3) below.

(1) First, access WebDepot on a PC with an Internet connection and create a “license update file.”

(2) Transfer the created “license update file” to the offline PC that is going to use the license.

(3) Import the transferred “license update file” on the offline PC.

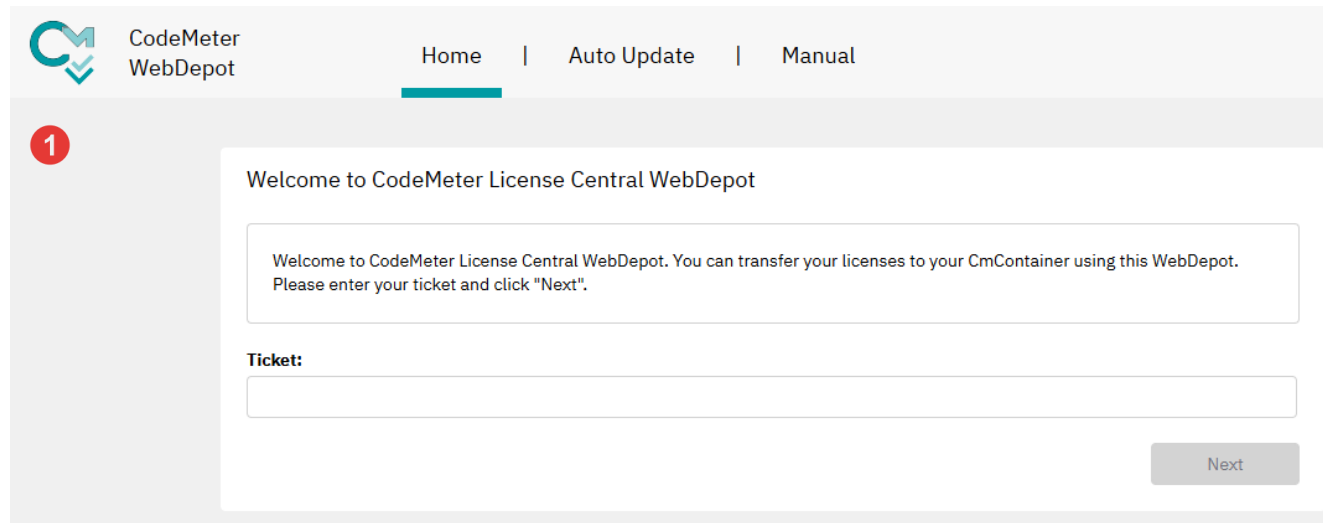

## 2) Direct license transfer mode: activation operation

## Online PC

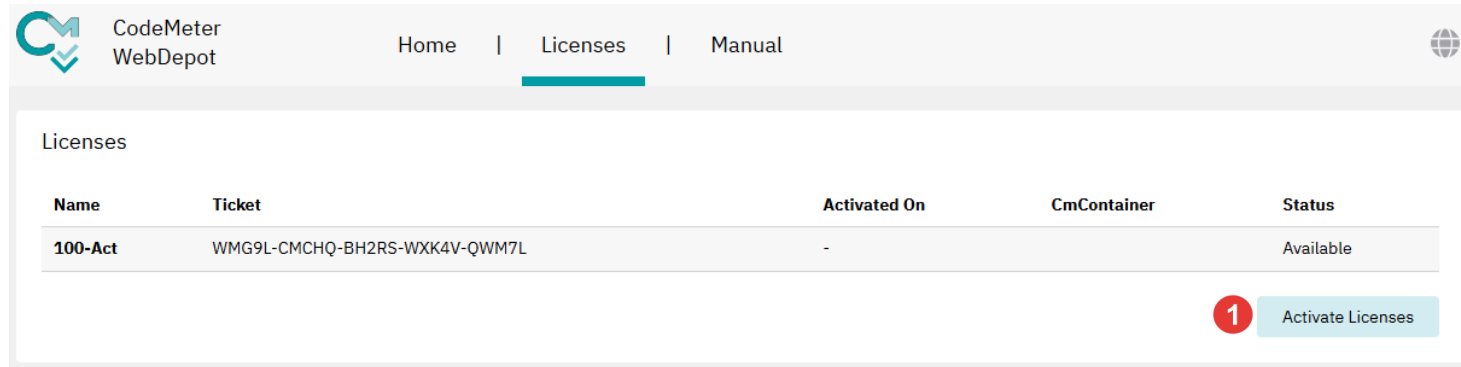

PC to access WebDepot

Open WebDepot on the PC with the **online environment** where you want to use the license and perform the operation. The license can be used after activation.

- 1 Open WebDepot on a PC connected to the internet, where you want to use the license.
- 2 Enter the ticket ID you received from the software vendor and click "Next".

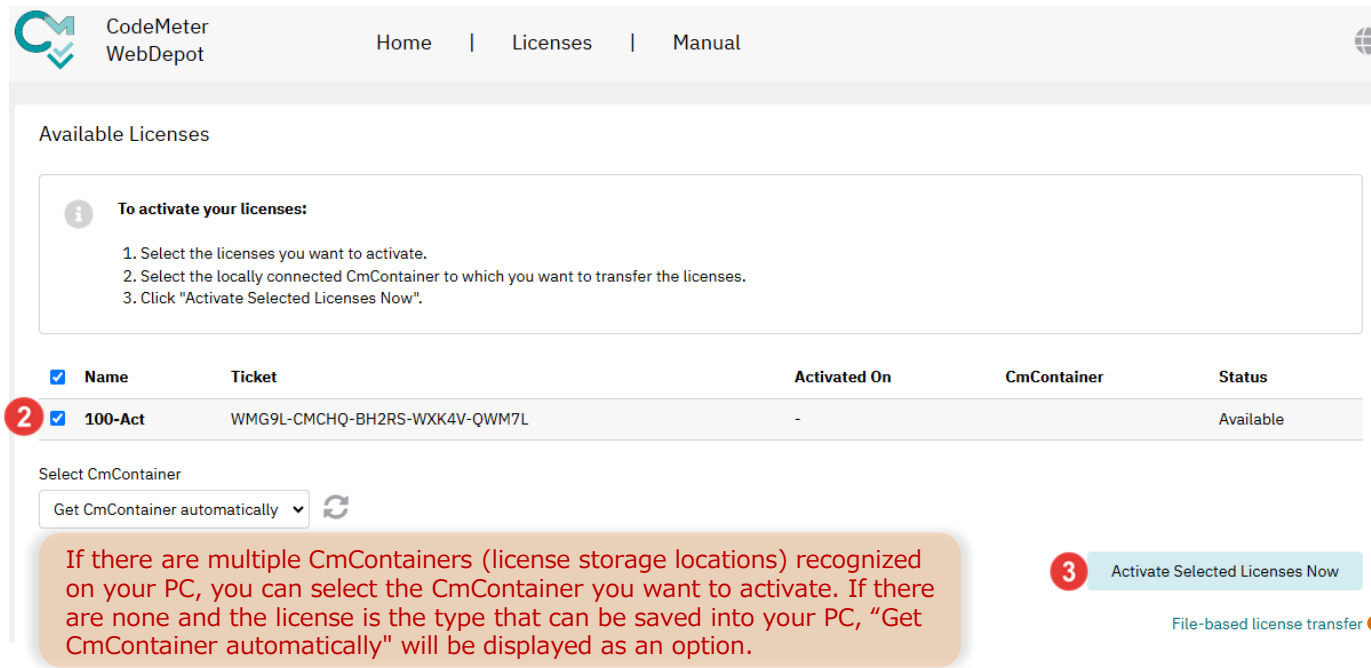

# License Activation for Online PC - 2

The screenshot shows the CodeMeter WebDepot interface with the 'Licenses' tab selected. A table lists one license with the name '100-Act' and ticket 'WMG9L-CMCHQ-BH2RS-WXK4V-QWM7L'. The status is 'Available'. A red circle with the number '1' points to the 'Activate Licenses' button.

Name	Ticket	Activated On	CmContainer	Status
100-Act	WMG9L-CMCHQ-BH2RS-WXK4V-QWM7L	-		Available

1 Click "Activate Licenses"

The screenshot shows the 'Available Licenses' page. It includes an information box with instructions: 'To activate your licenses: 1. Select the licenses you want to activate. 2. Select the locally connected CmContainer to which you want to transfer the licenses. 3. Click "Activate Selected Licenses Now".' Below this is a table with one license selected (checkbox checked). A red circle with the number '2' points to the selected checkbox. Below the table is a 'Select CmContainer' section with a dropdown menu set to 'Get CmContainer automatically'. A red circle with the number '3' points to the 'Activate Selected Licenses Now' button. Below the button, it says 'File-based license transfer'.

**To activate your licenses:**

1. Select the licenses you want to activate.
2. Select the locally connected CmContainer to which you want to transfer the licenses.
3. Click "Activate Selected Licenses Now".

<input checked="" type="checkbox"/>	Name	Ticket	Activated On	CmContainer	Status
<input checked="" type="checkbox"/>	100-Act	WMG9L-CMCHQ-BH2RS-WXK4V-QWM7L	-		Available

Select CmContainer  
Get CmContainer automatically

3 Activate Selected Licenses Now  
File-based license transfer

2 Select license to activate

\* If the link "Direct License Transfer" is displayed instead of "File-based License Transfer", the activation page for the offline PC is being displayed. Please click the link for "Direct License Transfer" before proceeding.

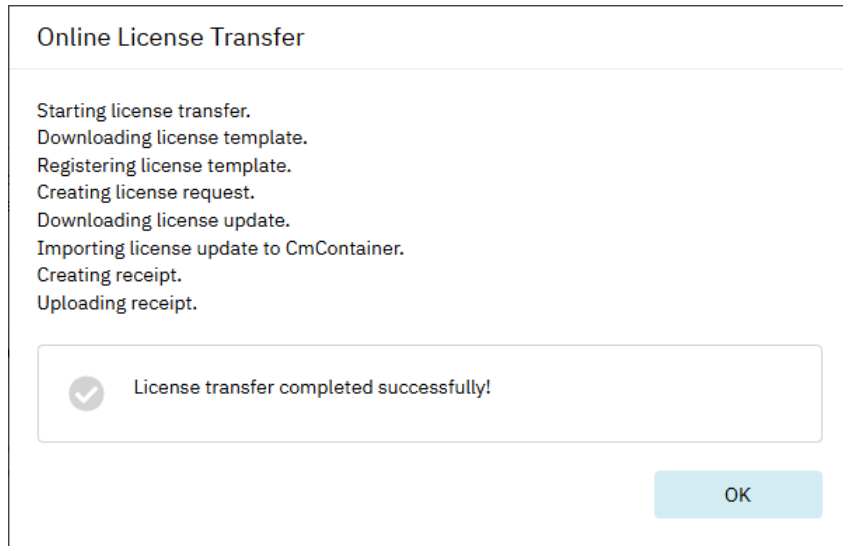

3 Click "Activate Selected Licenses now"

If there are multiple CmContainers (license storage locations) recognized on your PC, you can select the CmContainer you want to activate. If there are none and the license is the type that can be saved into your PC, "Get CmContainer automatically" will be displayed as an option.

# License Activation for Online PC - 3

The license activation process will begin and the results will be displayed.

When you see "License transfer completed successfully!", activation is complete.

Information about an activated license can be viewed by opening WebAdmin on a PC where the license is recognized. \* If it's a dongle, please connect it to the PC.

To open WebAdmin, enter the following URL in your browser:

http://localhost:22352

Activate Selected Licenses Now

2 File-based license transfer

\* If the link for "Direct License Transfer" is displayed instead of "File-based License Transfer", the "File-based License Transfer" page is already displayed. If so, skip step (2) and proceed to the steps on the next page.

2 Click "File-based license transfer"

# License Activation for Offline PC - 3

CodeMeter WebDepot Home | Licenses | Manual

Available Licenses

Upload Request | Download Update | Upload Receipt

**About file-based license transfer**

- If you want to save and use the license on another offline PC that does not have an Internet connection, you can follow the instructions on this page to download the license update file, transfer the file to the target offline PC, import it, and use the license.
- If you want to download and use the license on a PC with an Internet connection that can open this page, rather than on another offline PC, you can activate the license from the "Direct License Transfer" link in the bottom right, and then download and save the license directly into the selected CmContainer and use it.

**To activate your licenses via file transfer - First step "Upload Request":**

If you have activated licenses from this ticket already, you can transfer additional licenses into the same CmContainer(s). If you want to use another CmContainer, you need a license request file of this new CmContainer.

- Select an already used CmContainer or create a license request file with **Firm Code 6000010** for the CmContainer where you want to transfer the licenses to. This file can for example be created with CodeMeter Control Center ([open Operation Guide](#)). [How it works](#) +
- Select the licenses you want to activate.
- Select the created license request file, or input CmContainer serial.
- Click "Start Activation Now".

<input checked="" type="checkbox"/>	Name	Ticket	Activated On	CmContainer	Status
<b>1</b> <input checked="" type="checkbox"/>	100-Act	WK43X-2G7T8-55C8A-8CLCG-5TMFM	-		Available

Pick a license request file (\*.WibuCmRaC) of another CmContainer

**2**  No file chosen

or

Enter the serial of an already used CmContainer

**3**  Direct license transfer

**1** Select license to activate

**2** Select a "license request file"

\* The license request file must be created on the offline PC that will actually use the license. For detailed instructions on how to create a license request file, click the "open Operation Guide" link.

**3** (After selecting a "license request file")  
Click "Start Activation Now"

\* The next 3 pages contain instructions for creating a license request file. For the steps after (3), please refer to [license update file download page](#).

From the second time activation to the same CmContainer, the serial of the CmContainer can be entered instead of selecting a license request file. (e.g. 130-12345678)

Here you will select the license request file you created in the next three steps.

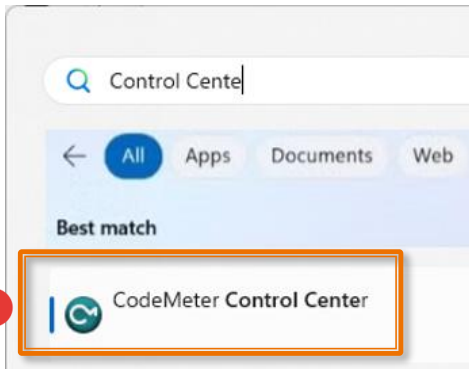

# License Activation for Offline PC - 4

## Offline PC

Create a license request file on the offline PC that will use the license.  
\* This assumes that CodeMeter Runtime has already been installed.

PC on which license is used

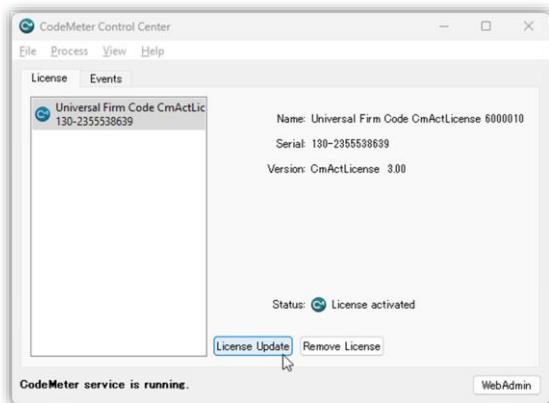

1

1

Open "CodeMeter Control Center"

\*The above image is an example for Windows

(If you want to store the license on the PC instead of on a dongle,) as shown in the image on the left, check whether there is a CmActLicense container starting with the serial number "130" on the CodeMeter Control Center screen. If it does not exist yet, you will need to import a LIF file and create a CmActLicense container. Please create it with the procedure on the right. \* If you want to store the license in a dongle, the procedure on the right is not necessary.

## Steps for creating a CmActLicense container

If you need to create a new CmActLicense container on an offline PC, go to the WebDepot screen on the previous page and click the following link on the online PC to download the LIF file.

## Online PC

Enter the serial of an already used CmContainer

**To activate your licenses via file transfer - First step "Upload Request":**

If you have activated licenses from this ticket already, you can transfer additional licenses into the same CmContainer(s). If you want to use another CmContainer, you need a license request file of this new CmContainer.

- Select an already used CmContainer or create a license request file with **Firm Code 6000010** for the CmContainer where you want to transfer the licenses to. This file can for example be created with CodeMeter Control Center (open Operation Guide), **How it works**.
- Start CodeMeter Control Center on the computer where the desired CmContainer is.
- Select this CmContainer. If no CmContainer is present on that computer, you can download a template here: **Download template now**. Import this template by dragging the downloaded file to CodeMeter Control Center.
- Click "License Update".
- Follow the instructions of the "CmFAS Assistant". Choose the option "Create license request".
- Choose a filename for the license request file.
- Click "Commit" to save the license request file.
- Transfer the license request file that you just created to this computer.
- Select the licenses you want to activate.
- Select the created license request file, or input CmContainer serial.
- Click "Start Activation Now".

**Click "Download template now" and download LIF file.**

(Continued on next page)

# License Activation for Offline PC - 5

Steps for creating a CmActLicense container (continued)

Online PC

PC to access WebDepot

Offline PC

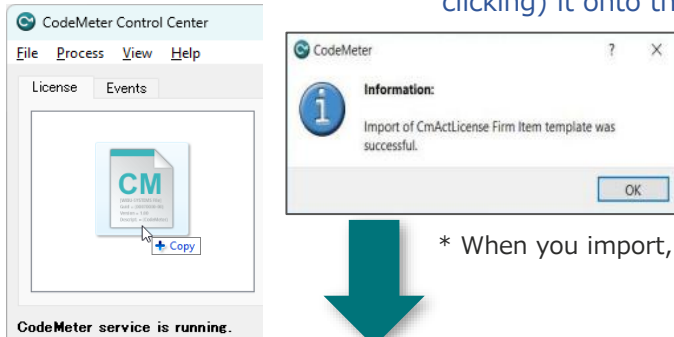

PC on which license is used

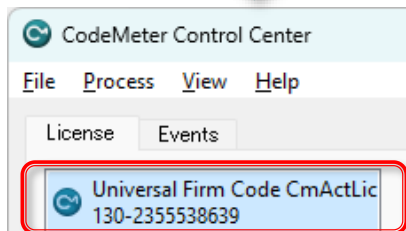

Transfer the LIF file downloaded on the previous page to the offline PC where you will use the license and import it into CodeMeter Control Center.

You can import the LIF file by double-clicking it or by dragging and dropping it into the CodeMeter Control Center window as shown below.

Import the LIF file by dragging and dropping (or double-clicking) it onto the CodeMeter Control Center screen.

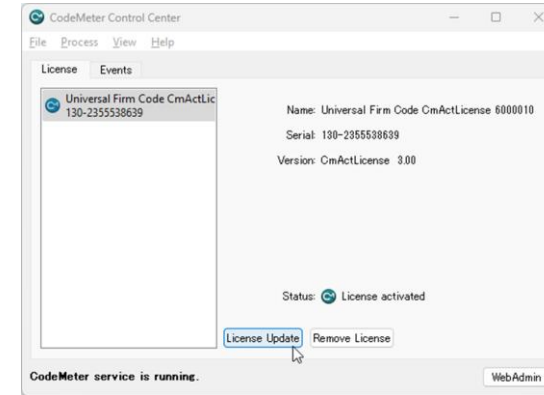

\* When you import, a message will appear indicating the result.

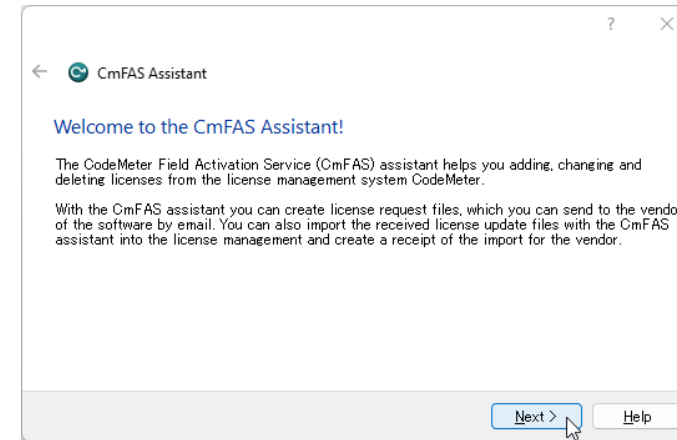

After import, a CmActLicense container with a serial number starting with 130 will be displayed in the CodeMeter Control Center.

Steps for creating a license request file

If you have a CmActLicense container in your CodeMeter Control Center, you can create a license request file from the CmActLicense container.

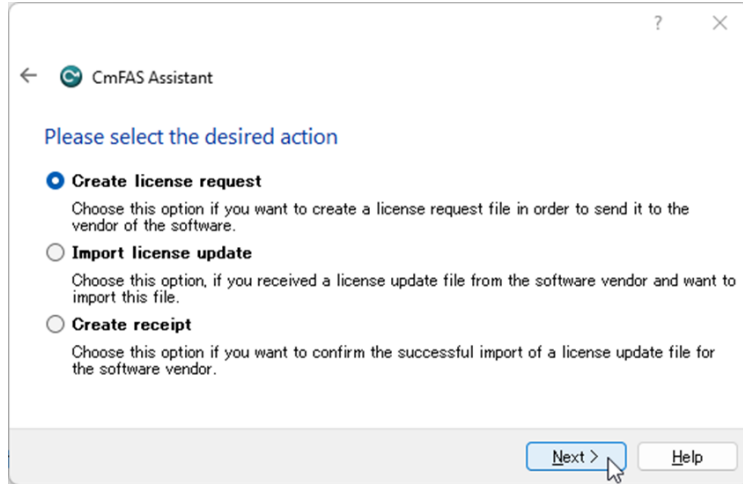

Select the CmContainer to which you want to transfer the license and click [License Update].

Follow the instructions in the "CmFAS Assistant" and click "Next".

# License Activation for Offline PC - 6

## Steps for creating a license request file (continued)

CmFAS Assistant

Please select the desired action

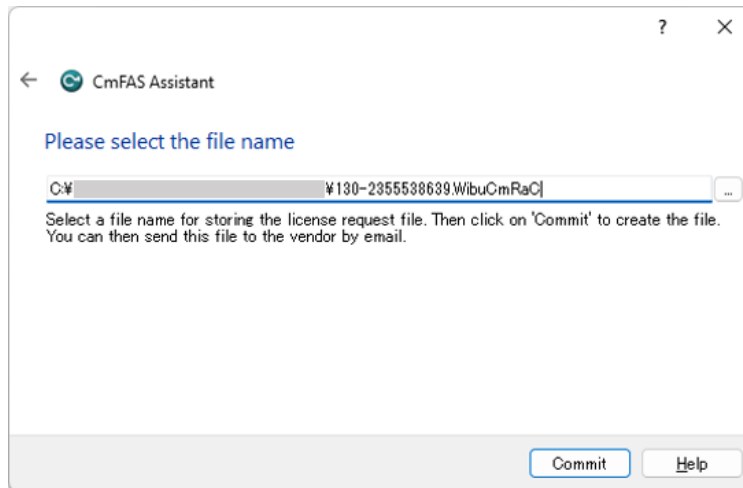

- Create license request**  
Choose this option if you want to create a license request file in order to send it to the vendor of the software.
- Import license update**  
Choose this option, if you received a license update file from the software vendor and want to import this file.
- Create receipt**  
Choose this option if you want to confirm the successful import of a license update file for the software vendor.

Next > Help

Click "Create license request" and "Next".

The license request file you created needs to be transferred to a PC that has online connectivity and WebDepot available.

After the transfer of the license request file, return to the page on WebDepot where you select the license request file for "File-based license transfer" mode, and resume the process from the step where you select the license request file.

CmFAS Assistant

Please select the file name

C:\¥ ¥130-2355538639.WibuCmRaC| ...

Select a file name for storing the license request file. Then click on 'Commit' to create the file. You can then send this file to the vendor by email.

Commit Help

Decide the file name and save location for the license request file you want to create, then click "Commit".

## Online PC

PC to access WebDepot

## Downloading/importing license update files

\* these are steps after [license activation page](#)

CodeMeter WebDepot Home | Licenses | Manual

Download License Update File

Upload Request v Download Update Upload Receipt

**To transfer your licenses via file - Second step "Download Update":**

1. (If license update file is not yet imported to the target CmContainer) Click "Download License Update File Now" and save the file on your computer.
2. (If license update file is not yet imported to the target CmContainer) Import this license update file to the CmContainer with Serial 130-3456155725. This file can for example be imported with CodeMeter Control Center. [How it works](#)
3. After you have successfully transferred the license update file to the CmContainer, click "Next" to confirm the license transfer.

1 Download License Update File Now Next

Direct license transfer

### 1 Click "Download License Update File Now"

The downloaded "license update file" is then transferred to the offline PC that will use the license and imported.

### 2 Transfer the license update file downloaded from WebDepot to the offline PC that uses the license.

### 3 Import the license update file by dragging and dropping it into the CodeMeter Control Center

\* You can also import the license update file by double-clicking it.

The license can now be used on an offline PC. From here on, it is optional, but if you create a license receipt file and upload it to the server, the information about the completion of license import will be shared to the license server. Uploading the file will make the situation clearer, and thus it becomes easier to process events in the future, such as license loss (e.g. PC corruption, etc.).

You can create the license receipt file on your offline PC (next page).

## Online PC

PC to access WebDepot

Open WebDepot on the PC with the online environment where you want to use the license and perform the operation.

- 1 Open WebDepot on a PC connected to the internet, where you want to use the license.
- 2 Enter the ticket ID you received from the software vendor and click "Next".

# Check the status of incomplete activation and continue the process (Direct license transfer mode)

CodeMeter WebDepot

Home | Licenses | Manual

### Licenses

Name	Ticket	Activated On	CmContainer	Status
100-Act	WMG9L-CMCHQ-BH2RS-WXK4V-QWM7L	2025-02-28 15:14:19	130-3456155725 (WIBU-MAAZ01-A)	1 Not completed

2 Continue License Transfer

1 Check the "Status" column of the displayed license information

If the license activation process is not yet complete, "Not complete" is displayed.

2 Click "Continue License Transfer"

If the status is "Not complete," the "Continue License Transfer" button is displayed. You can press this button to continue the incomplete part of the license transfer.

### Continue License Transfer

**What is "Continue License Transfer"?**

When you execute license activation, the following 3 steps will be performed internally.

1. License activation on server side
2. Transfer of license update file from server to the target [CmContainer](#)
3. Upload of [license receipt file](#) from the target CmContainer to the server

If some operation of these, such as 3. upload of license receipt file, was not completed in the activation, "Continue License Transfer Now" button will be displayed on "Licenses" page of WebDepot, and through this button, the incomplete operation can be continued.

If you continue the operation of file-based license transfer for offline PC, please click "File-based license transfer" link, then you can continue the operation in the mode.

**To continue the license transfer:**

1. If you continue in this mode, make sure that the CmContainer with **Serial 130-3456155725** is connected to this computer. If this CmContainer cannot be connected to this computer, please open this page on another computer where this CmContainer is available and continue the operation, or use "File-based license transfer" instead.
2. Click "Continue License Transfer Now".

\*The status "Not complete" may occur if you close the browser during the activation process, if the network connection is interrupted, etc.

Also, the status will be "Incomplete" if you have not uploaded the receipt file in "Offline License Transfer" mode.

3 Click "Continue License Transfer Now"

An explanation will be displayed about continuing the license transfer.

If the CmContainer for which you want to activate the license exists on the online PC you are currently using, or is recognized, click the "Continue license transfer" button to continue the process.

\* If the "Direct license transfer" link is displayed, "File-based license transfer" page is being displayed. In that case, click the "Direct license transfer" link to switch the mode.

3 Continue License Transfer Now

File-based license transfer

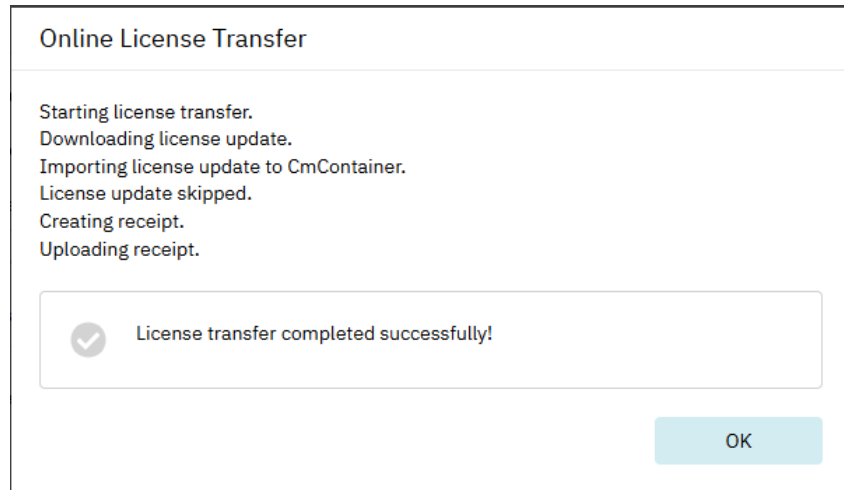

If the CmContainer for which you want to activate the license is on an offline PC, click the "Offline License Transfer" link to switch mode.

-> [steps to use license on an offline PC](#)

# Confirm that the license transfer is complete

The incomplete license activation process will begin and the results will be displayed.

When you see "License transfer completed successfully!", activation is complete.

Information about an activated license can be viewed by opening WebAdmin on a PC where the license is recognized. \* If it's a dongle, please connect it to the PC.

To open WebAdmin, enter the following URL in your browser:

2 Continue License Transfer

### Continue License Transfer

**What is "Continue License Transfer"?**

When you execute license activation, the following 3 steps will be performed internally.

1. License activation on server side
2. Transfer of license update file from server to the target [CmContainer](#)
3. Upload of [license receipt file](#) from the target CmContainer to the server

If some operation of these, such as 3. upload of license receipt file, was not completed in the activation, "Continue License Transfer Now" button will be displayed on "Licenses" page of WebDepot, and through this button, the incomplete operation can be continued.

If you continue the operation of file-based license transfer for offline PC, please click "File-based license transfer" link, then you can continue the operation in the mode.

**To continue the license transfer:**

1. If you continue in this mode, make sure that the CmContainer with **Serial 130-3456155725** is connected to this computer. If this CmContainer cannot be connected to this computer, please open this page on another computer where this CmContainer is available and continue the operation, or use "File-based license transfer" instead.
2. Click "Continue License Transfer Now".

3 Continue License Transfer Now

3 File-based license transfer

\* The status "Not complete" may occur if you close the browser during the activation process, if the network connection is interrupted, etc.

Also, the status will be "Not complete" if you have not uploaded the receipt file in "File-based License Transfer" mode.

1 Check the "Status" column of the displayed license information

If the license activation process is not yet complete, "Not complete" is displayed.

2 Click "Continue License Transfer"

If the status is "Not complete," the "Continue License Transfer" button is displayed. You can press this button to continue the incomplete part of the license transfer.

3 Click "File-based license transfer"

An explanation will be displayed about continuing the license transfer.

To continue processing the license for use on an offline PC instead of the online PC where you are currently operating WebDepot, click the "File-based license transfer" link.

If the PC that will use the license is an online PC operating WebDepot, click the "Continue License Transfer Now" button.

-> [steps to use license on an online PC](#)

# Continue processing (File-based license transfer mode) - 1

## Downloading/importing license update files

CodeMeter WebDepot Home | Licenses | Manual

Download License Update File

Upload Request v **Download Update** Upload Receipt

**To transfer your licenses via file - Second step "Download Update":**

1. (If license update file is not yet imported to the target CmContainer) Click "Download License Update File Now" and save the file on your computer.
2. (If license update file is not yet imported to the target CmContainer) Import this license update file to the CmContainer with Serial 130-3456155725. This file can for example be imported with CodeMeter Control Center. [How it works](#)
3. After you have successfully transferred the license update file to the CmContainer, click "Next" to confirm the license transfer.

**1** Download License Update File Now Next

Direct license transfer

### 1 Click "Download License Update File Now"

The downloaded "license update file" is then transferred to the offline PC that will use the license and imported.

### 2 Transfer the license update file downloaded from WebDepot to the offline PC that uses the license.

### 3 Import the license update file by dragging and dropping it into the CodeMeter Control Center

\* You can also import the license update file by double-clicking it.

The license can now be used on an offline PC. From here on, it is optional, but if you create a license receipt file and upload it to the server, the information about the completion of license import will be shared to the license server. Uploading the file will make the situation clearer, and thus it becomes easier to process events in the future, such as license loss (e.g. PC corruption, etc.).

You can create the license receipt file on your offline PC (next page).

Information:

Update for CmContainer 130-...	--> successful
Update for CmContainer 130-...	--> successful (2 times)

OK

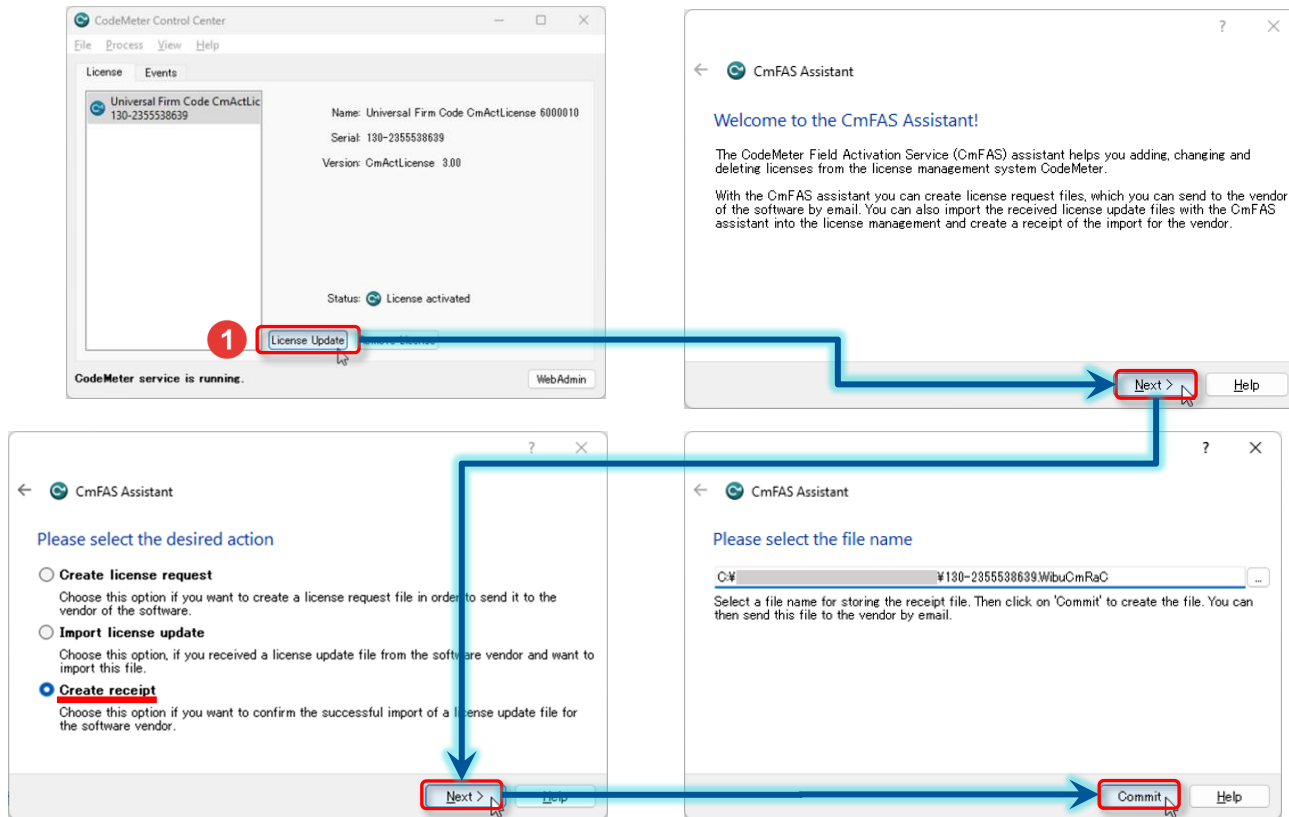

\*The above image is an example for Windows

\* When you import, a message will appear indicating the result.

# Continue processing (File-based license transfer mode) - 2

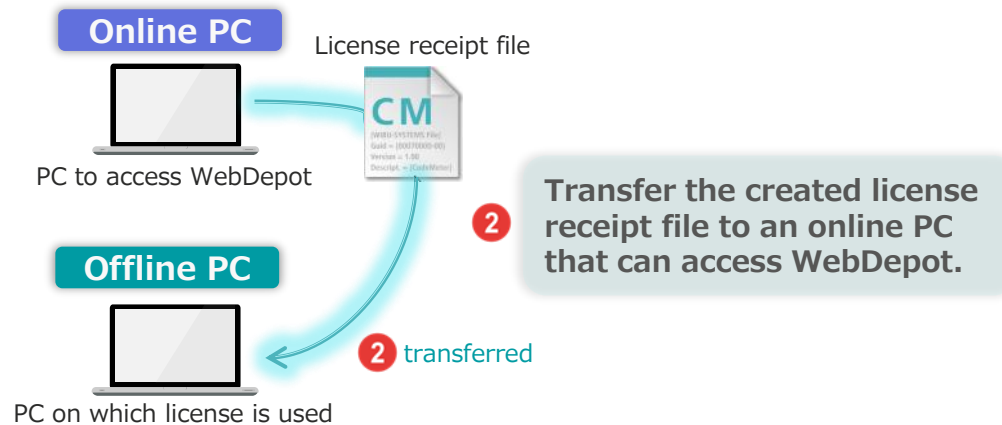

## Steps for creating license receipt file

Perform the operation with the target CmContainer selected in CodeMeter Control Center.

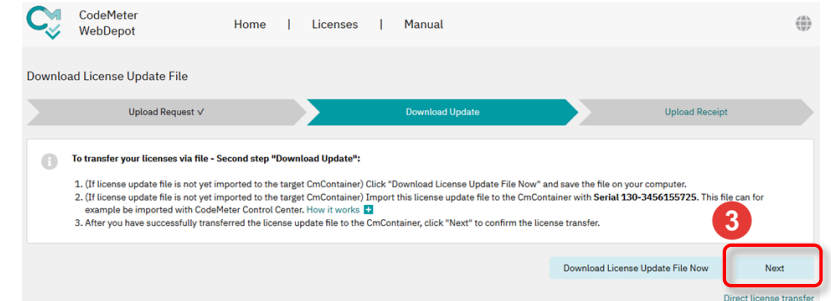

- 1 In the CodeMeter Control Center, click "License Update" -> "Next" -> (select "Create receipt") -> "Next" -> "Commit" to create a license receipt file.

\* Change the file save location if necessary.

2 Transfer the created license receipt file to an online PC that can access WebDepot.

- 3 Return to the license update file download page and click "Next".

# Continue processing (File-based license transfer mode) - 3

## Steps for uploading license receipt file

CodeMeter WebDepot Home | Licenses | Manual

Confirm License Transfer

Upload Request v Download Update Upload Receipt

**To transfer your licenses via file - Third step "Upload Receipt":**

1. Create a license receipt file from the CmContainer with **Serial 130-3456155725** and **Firm Code 6000010**. This file can for example be created with CodeMeter Control Center. [How it works](#) +
2. Select the created license receipt file.
3. Click "Upload Receipt Now".

If you haven't imported the license update file yet, you can download it again. Click "Back" to get to the download page.

Pick license receipt file (\*.WibuCmRaC)

**1** Choose File No file chosen

**2** Upload Receipt Now Back

Direct license transfer

**1** Select license receipt file

**2** Click "Upload Receipt Now"

Click the "Upload Receipt Now" button and the result of uploading the receipt file will be displayed.

If no errors are displayed, the process is complete.

License Transfer Successfully Completed

The license transfer has been completed successfully.

OK

Information about an activated license can be viewed by opening WebAdmin on a PC where the license is recognized. \* If it's a dongle, please connect it to the PC.

To open WebAdmin, enter the following URL in your browser:

`http://localhost:22352`

\* Same as [WebAdmin](#) during online activation

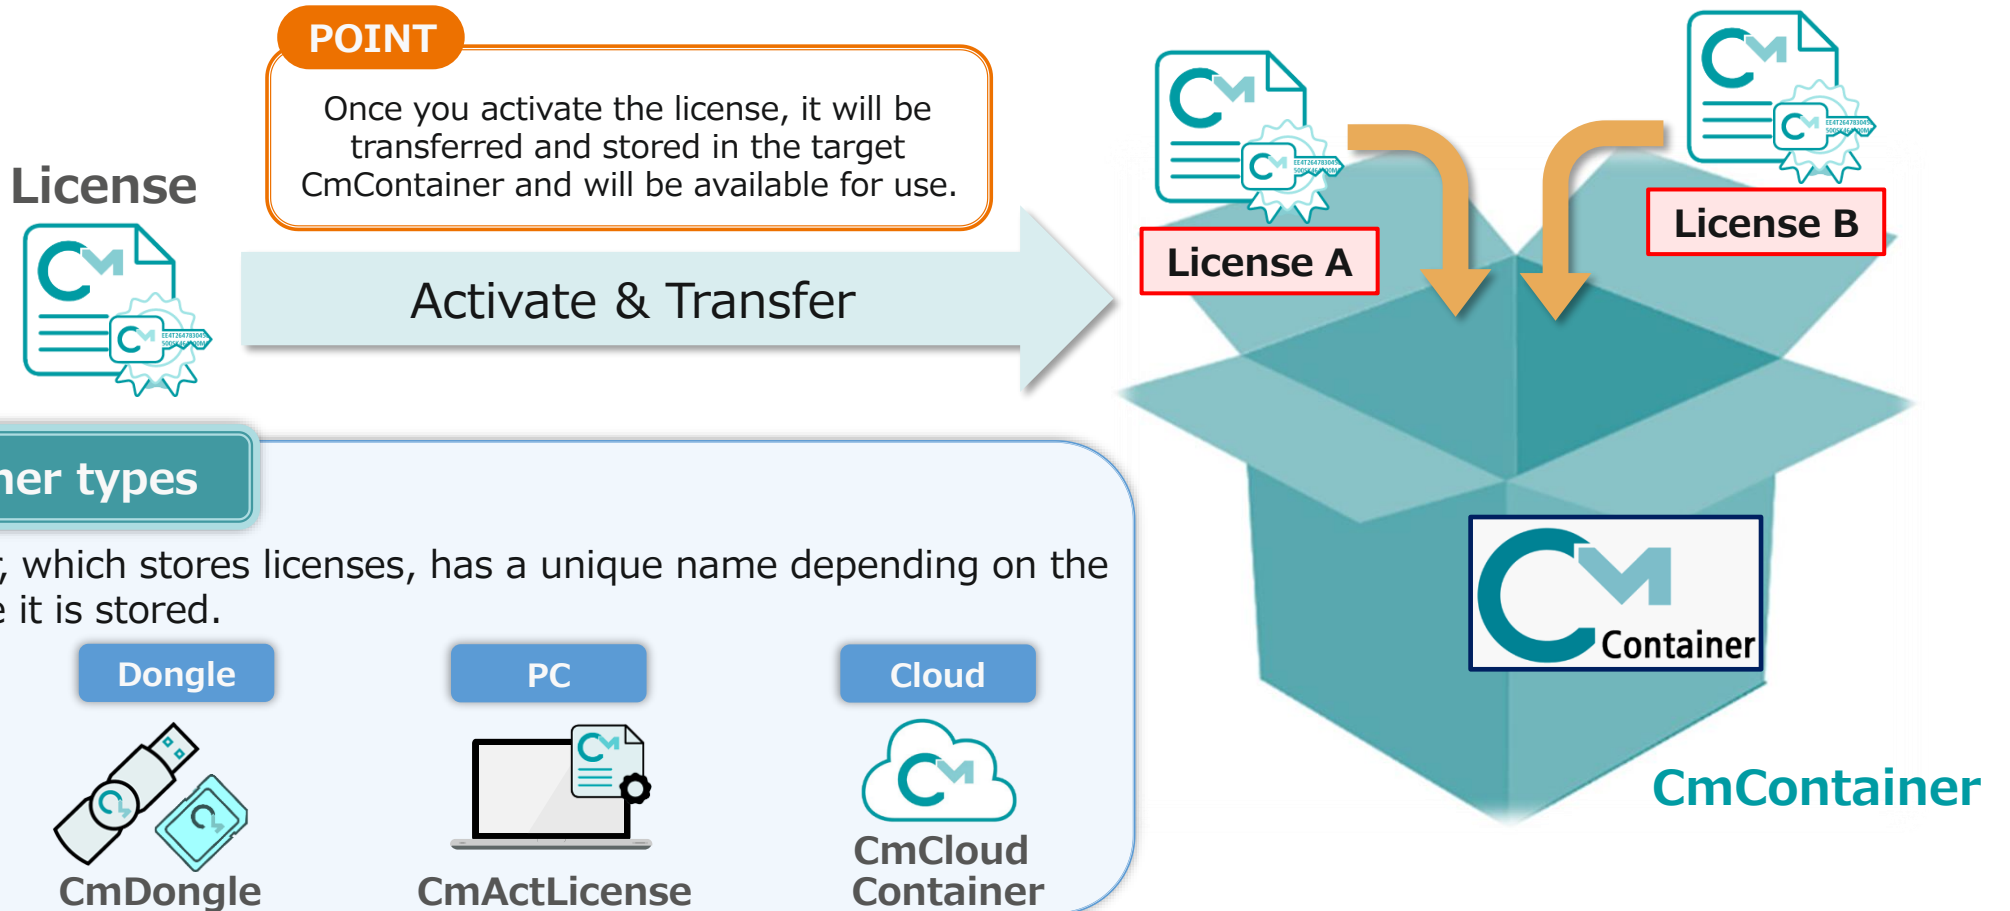

## 6) Terminology used on WebDepot

---

# What is CmContainer?

- ▶ To use a license, you need to activate it and save it in a license container (**CmContainer**).

- CmContainer is a container (data area) that stores licenses.

# What is Firm Code?

- The company identification code, which represents the company or organization that issued the license, is referred to as the '**firm code**.'
- In contrast, the product identification code, which represents (or a function) is referred to as the '**product code**.'

Individual licenses are primarily identified by these two codes.

IDs used to identify  
the license

Company/  
Organization

- Firm Code  
ID to identify the license issuer

Product

- Product Code  
ID to identify the product

# What is Auto Update?

- ▶ The type of license activation that specifies a CmContainer to store the license after activation is called "Auto Update".

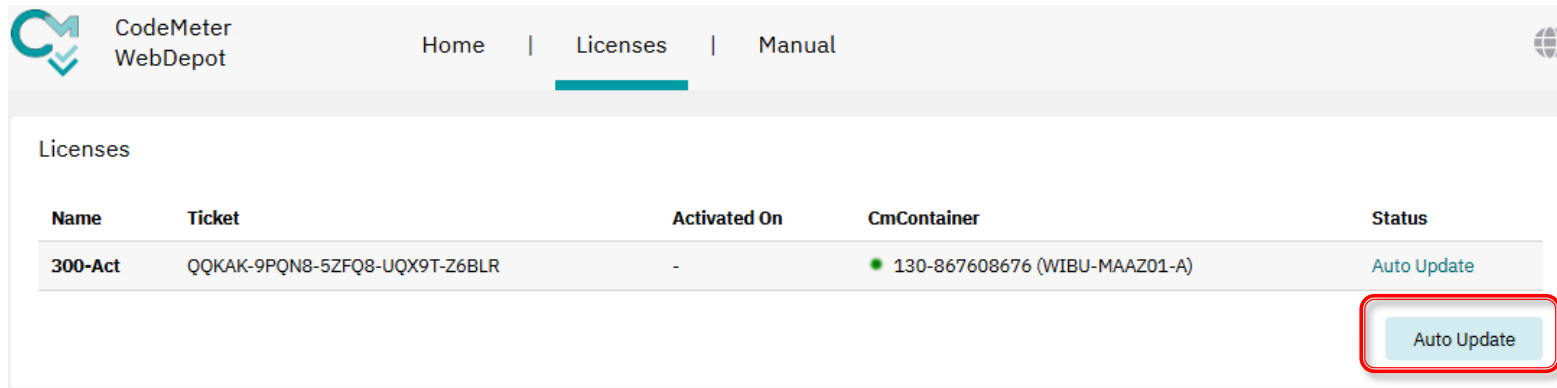

e.g. Licenses can only be saved in CmContainer with serial number 130-123456789

## License

CmContainer to transfer license is fixed

- If your license allows "Auto Update", the button will say "Auto Update" instead of "Activate", but the procedure remains the same.
